Danderine

Grows Hair and we can PROVE IT

ANDERINE is to the hair what fresh showers of rain and sunshine are to vegetation. goes right to the roots, invigorates and strengthens them. Its exhilarating, stimulating and life-producing properties cause the hair to grow abundantly long, strong and beautiful. It at once imparts a sparkling brilliancy and velvety softness to the bair, and a few weeks' use will cause new hair to sprout all over the scalp. Use it every day for a short time, after which two or three times a week will be sufficient to somplete whatever growth

A lady from St. Peul writes in substance, as follows: "When I began using Danderine my hair would not come to my shoulders and now it is away below my bips."

Another from Newark, N. J. "I have been using Danderine regularly, When I first started to use it I had/very lit-tic hair, now I have the most beautiful lions and thick hair shyone would want to have."

NOW at all druggists in three sizes 25c, 50c and \$1.00 per bottle

Danderine enjoys a greater sale than any other one preparation regardless of kind or brand, and it has a much greater sale than all of the other hair preparations in the world combined.

FREE To show how quickly Danderlas acts, we will send a large sample free by return mail to anyone who sends this free coupen to the KNOWLTON DANDERINE CO., CHICABO, ILL., with their name and address and 10 in silver or stamps to pay postage.

A LINIMENT FOR EXTERNAL USE

Cheerfulness and a bright disposition during the months before baby comes, are among the greatest blessings a mother can bestow upon the little life about to begin. Her happiness and physical comfort will largely govern the proper development of the health and nature of the child. Mother's Friend contributes much to the mother's happiness and health by the relief and mental comfort it affords. It is a liniment composed of penetrating oils and medicines which inbricate the muscles and tendons of the body, soothe the swollen mammary glands, cause a gradual expansion of the skin and tissues, and aid in the relief of nausea. The regular use of Mother's Friend greatly lessens the pain and danger when baby comes, and assures a quick and natural recovery for the mother. Mother's Priend is sold at drug stores. Write for our free book, containing valuable information for expectant Mothers.

customs to enforce the rule laid down by the secretary of agriculture three years ago and to sieze and hold any meats brought over from a foreign country without the proper certificate of inspection. The is put a stop to the international filences.

Want insuring the proper certificate of inspection. The left includes the international filences.

Many inquiries we been made of those along the boder as to how they were to obtain these "certificates by the proper authority" Dr. T. A. Bray, representing the bureau of animal industry of the department of agricul-ture, in a supervisory capacity along the entire Mexican border from the Colorado river to Brownsville, explains that this means a certificate of inspec-tion from some Mexican official having authority to make meat and food in-spections. It is therefore up to the Mexican butchers along the border, if they want a continuation of the American border trade, to secure such inspectors, but even with an inspector in each town, it is explained that the plan would hardly be feasible, as there are many meat markets in all the border towns, and it would be impossible for the inspector to be at all of these so that he could certify to every purchase made and, according to the ruling, every importation of meat must be accompanied by a certificate showing it to be in good condition and to have been killed under sanltary regulations

T. S. Inspection Postable.

Dr. Bray explained that the United States could not station at inspector in Mexico to make these inspections. off the new Sunset addition to Valentine.

ceptions, a drain on its resources. Control of Midwives.

The legal control of midwives by the

states in which tary live and practice was urged by Miss Carolyn C. Van Blarcom of New York, in an address before the conference this morning. "Midwives, the majority of whom are untrained, unlicensed, and unregister said Miss Van Blarcom, over a large proportion of births oceither be eliminated or educated and supervised as in European countries. Midwives could be controlled and the standard raised in this country by having existing schools of midwifery taken under the control of the state board: of regents, the standards of these schools being established and main tained by these boards. A diploma from such a school would entitle the holder to a certificate from the board of health in the locality where she wished to practice, this board of health having power and authority to critically supervise the work, home, and equip ment of such midwife, and to revoke her license for sufficient reasons. To accomplish these ends, wide publicity to the movement for the prevention of lindness must be given, assistance brough legislation, concerted action of
